REASONS FOR ALLOWANCE

Response to Arguments

1. Applicant's arguments, see Remarks, filed -7/29/2005, with respect to the references by Kuwabara et al and Tuckerman et al have been fully considered and are persuasive. The previous rejection of the claims 1-6 has been withdrawn.

2. The following is an examiner's statement of reasons for allowance: The claims 1-6 are allowable over the prior art of record for at least the reason that the prior art fails to teach or suggest a method of cooling a semiconductor die, comprising the steps of: flowing fluid through micro-channels formed into the die; communicating fluid from the die to a condenser arranged above the die; cooling fluid at the condenser; and communicating fluid from the condenser to the micro-channels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Kuwabara et al teach a method of cooling a semiconductor die 12, comprising the steps of: flowing fluid through micro-channels 26 formed into a cooling plate 27; communicating fluid from the plate 27 to a condenser 10 arranged above the die 12; cooling fluid at the condenser; and communicating fluid from the condenser to the micro-channels 26. Kuwabara et al do not teach said micro-channels being formed directly into the die.
